Suppliers of electrical energy do not undertake to supply a continuous or unvaried flow of power. Despite the degree of sophistication reached in energy distribution systems, there unfortunately remain many circumstances beyond our control, which give rise to interruptions or power variations. As you can appreciate, the utility has no control over these types of event. All insurance claims are adjudicated by the MEARIE Group, on a case by case basis.

What can I do if I can't be without the property that was damaged?

We understand that sometimes a customer has a piece of equipment that needs to be repaired or replaced immediately. If that is the case, it is important to understand that you are proceeding with those repairs or replacement at your own risk. Whether these costs are covered depends on the decision of the MEARIE insurance adjuster. Alternatively, you may wish to contact your home insurance company.
